Dedicated and experienced Computer Engineer with extensive knowledge of engineering principles, theories, specifications, and standards. Adept in carefully diagnosing and assessing issues, and offering real viable solutions. I am a passionate and motivated Computer Science graduate with a strong foundation in programming, problem-solving, and software development. My skills include proficiency in programming languages such as Java, Python as well as familiarity with data structures, algorithms, and object-oriented design principles. I have hands-on experience with web development, databases, and version control systems like Git.
